

EBICS (Electronic Banking Internet Communication Standard) is a trend setting standard for the electronic data exchange with financial institutes.

2003 EBICS was initiated in Germany as an internet based specification of the «DFÜ – convention» (a specification of the convention about data transfers between customer and financial institutes). Previously only used in Germany and France, EBICS is now spreading out in the international market.

EBICS is characterized by the following qualities:

- Modern technology, international standards like XML, https, TLS, ZIP
- Highest security by end to end encryption

Based secure internet protocols, EBICS enables a flexible, efficient, traceable and safe way to carry out banking business, even with a high transaction volume.

With **EBICS Integrator** from Etops AG you can use this new and secure method today and be prepared for the future. EBICS Integrator is available for downloads from BLKB, Credit Suisse, DZ Bank, LUKB, SGKB, TGKB, UBS, VP Bank and ZKB.

The EBICS Integrator is available for end users as well as for use in batch mode.

Using EBICS Integrator you have an easy to manage tool, that is prepared for communication with further financial institutes in future.

## System requirements as of October 2023

- 15 MB for installation + sufficient space for the configuration (5 MB) and for downloaded files (space dependent on customer) in directories that are available to all EBICS Integrator users
- .net Framework 4.5 or higher in-place upgrade thereof
- Windows Server 2019, 2016, 2012 R2, 2012
- Windows 10, 8.1
- printer to print the initialization letters
- contract(s) with the bank(s) to enable EBICS downloads

Windows operating systems that are no longer supported should not be used, especially not for a secure data communication. EBICS Integrator itself is not supported on Windows versions that are no longer supported by Microsoft, as well as older ones than mentioned above.

The EBICS Integrator user interface is available in different languages: English, German, French, Italian as well as Spanish. Support is available in English and German.

Please contact [ebics@etops.ch](mailto:ebics@etops.ch) for further information or to obtain a license.

## About Etops AG

Etops was founded in 2010 and offers a broad range of solutions and services for the financial industry from data collection, refinement and aggregation to high-end operations and consulting, from complex integration projects to state-of-the-art reporting, from data analytics and warehouses to mobile apps and dashboards.

One of our core business is to enable our customers to integrate their financial transactions and related data, straight into their reporting and accounting systems, in an automated and fully traceable fashion.

We developed the highly flexible software solution Business Integrator, which automatically processes and enriches the financial messages for straight through processing towards the target financial systems.

You benefit from our expert banking knowledge and experience based on our familiarity with customer requirements. As expert professionals we offer comprehensive consulting to help you reach your financial data integration goals.
